

# Contents

Biclassified blockmodels as mixtures of standardized contingency tables with beta-distributed entries <i>Marianna Bolla, Fatma Abdelkhalek</i>	1
The General Linear Group of Degree $n$ for 3D-Matrices, $GL(n, n, p; F)$ <i>Orgest Zaka</i>	13
Some Inequalities for Semi-Inner Products on Complex Banach Spaces <i>Silvestru Sever Dragomir</i>	33
A new class of harmonic univalent functions defined by an operator <i>Luminița-Ioana Cotîrlă and Adriana Cătaș</i>	53
Upper bound of the norm of an infinite matrix with positive entries <i>Ismail Nikoufar</i>	65
Ostrowski type fractional integral operators for generalized $(r; s, m, \varphi)$ -preinvex functions <i>Artion Kashuri and Rozana Liko</i>	73
An application of the power series distribution for certain analytic univalent function classes <i>Serkan Çakmak, Sibel Yalçın and Şahsene Altınkaya</i>	97
