A C K N O W L E D G E M E N T

For updating the list of mathematicians and computer scientists of Romanian extraction, the editor has received the help of Prof.Solomon Marcus from the Bucharest University, Prof. Alexandru Solian from the University of North Carolina in Charlotte and Dr. Dan Pascali from New York. The editor expresses his thanks for their contribution.

We kindly ask our colleagues who have information pertaining to this category of Romanian mathematicians (residing outside Romania) to share with us this information (address, affiliation etc.).

We also ask our colleagues to provide us with any information related to Romanian mathematicians residing outside Romania, such as participation in mathematical meetings, publication of books, participation in international activities (international organizations such as IMA, European Mathematical Society).

Another important aspect would consist in achieving more systematic and durable connections between the Romanian mathematicians in Romania, and those outside the country. Any suggestions in this regard will be appreciated and Libertas Mathematica will insert any pertaining information in this sense.
