

C O N T E N T S

Three-person games with a cross-entropic criterion	1
Rodica Branzei	
Asymptotic behavior of differential equations	13
Raul Naulin and Jaime Urbina	
On multivariate generalizations of Hardy's inequality	23
B.G.Pachpatte	
Ray optics on surfaces	49
Mostafa Ghandehari	
On the unique solvability of semilinear problems with strong monotone nonlinearity	53
Cristinel Mortici	
A linear delay-differential equation of the second order	59
Adrian Corduneanu	
The relation between the abstract and geometric duals of a planar graph	71
Laurentiu Modan	
Two functions in number theory and some upper-bounds for the Smarandache function	77
Sabin Tabarca and Tatiana Tabarca	
The singular Lagrange spaces	87
Emil Stoica	
Hamilton-Jacobi equations related to a control problem	93
Catalina Davideanu	
On the integral equation for airfoil design	107
Mircea Lupu and Ernest Scheiber	

Controllability of delay-integrodifferential systems in Banach spaces	119
K. Balachandran and R. Sakthivel	
A criterion of relative compactness in the space $B_{1s}(\mathbb{R}^n)$	129
S. Zaidman	
Unidimensional flows of second grade fluid in spherical domains	135
R. C. Fetecau and C. Fetecau	
Priorities and contributions of Florin Vasilescu to the theory of multifunction	145
T. Birsan	
Approximation procedures for an abstract LQ-optimal control problem	159
Zephirinus Okonkwo	
A class of second order boundary value problems occurring in capilarity theory	173
N. C. Apreutesei	
Notes on the equation $Bx'(t) = Ax(t)$ in Banach space	193
Gaston M. N'Guerekata	
MISCELLANEA	199
